Test Jest | Cypress | Mocha | Chai

Design Tool Figma

PROJECTS

Lighthouse town https://lighthouse-town.herokuapp.com
- A gamification chat app that enables chatting, avatar moving and sharing video in real-time
- Planned from writing **user stories** to draw **ERD**
- Based on **React.js**, implemented avatar movement with arrow keyboard using **Canvas API**
- With full knowledge of **Socket.I.O**, applied chat function, synced movements of all avatars and enabled to share video in real-time
- Implemented server using **Node.js** and used **PostgreSQL** for database

Pick The Dishes https://pickthedishes.herokuapp.com
- A food ordering and order management app for restaurant that provides SMS notification
- Logged as user ID 1, it will show order management page and as user ID 2, will show customer side
- Wrote **user stories,** drew **ERD,** wrote schema for database and made **mock-up** for structure
- Implemented server with **Node.js** and used **Axios** and **ajax** for ordering and management function
- Enabled customer and restaurant owner to get notified when food is ready or ordered using **Twilio API**
- Built database with **PostgreSQL** and designed **REST API**

Tiny App https://github.com/IamHPark/tinyapp
- An URL shortener app for easy sharing and counting visit numbers
- Used **Node.js** with **Bcryt, body-parser, cookie-session** and **method-override** middleware for server side
- Applied **EJS** to implement front-end with dynamic contents

BIONE Life Ltd. e-commerce
- Designed web mockup and marketing content using **Figma**
- Build **Shopify** e-commerce sites and manipulate templates with **Liquid**

EXPERIENCE

Freelancer 2022.06 – Present
